# MediaTek helio | P90

## New AI Flagship

Super AI Powerhouse / Extraordinary AI Camera

Dr. Yenchi Lee / Senior Director  
MediaTek Wireless Communications BU

### AI Performance Upgrade

- New APU 2.0 Architecture
- TMACs AI Power

### Camera Experience Upgrade

- AI + Flagship 3x ISP
- Best night shots and portrait photography

### CPU / GPU Upgrade

- CPU Upgrade A75 / A55 Architecture
- GPU improve by 50%

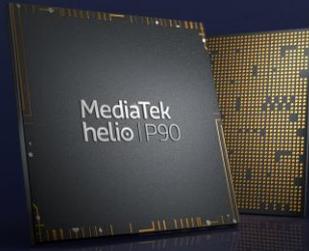

### Connectivity Upgrade

- Support Cat-12, 3xCA, 4x4 MIMO
- Support 802.11ac 2x2 MIMO

# APU 2.0

New AI Computing Architecture : 4x AI performance , Half the power consumption

# Design Challenges of Edge AI Processors

EDGE AI Processor  
Considerations :

# APU 2.0 Upgrades

MediaTek helio | P90

> **1.1T** MACs

AI Computing Capability

Flagship AI Performance

4x better than APU 1.0

Support Fixed and Floating Point Computing

Support both INT8 and FP16

Super Low Power

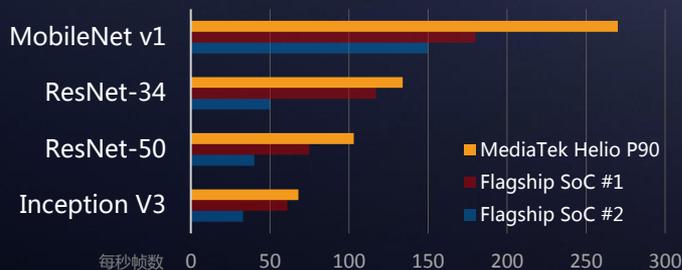

Power consumption is  
50% lower than APU 1.0

Low Bandwidth Requirements

50% lower bandwidth  
requirements

# Flagship Smartphone SOC AI Capability Comparison

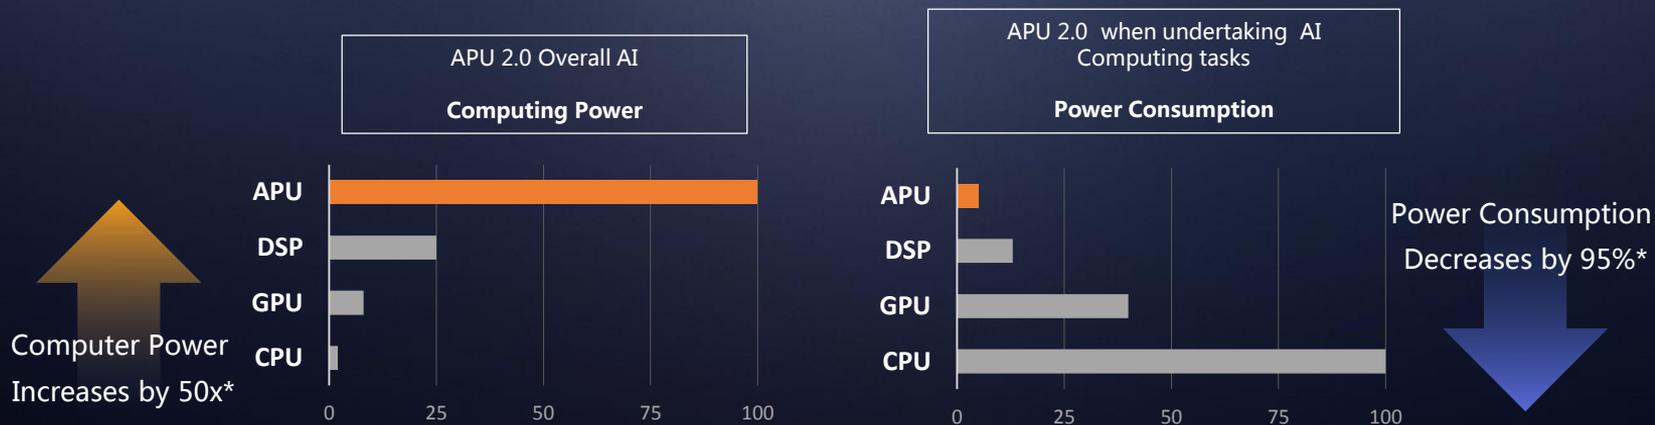

4 common AI networks  
**AI Computing Efficiency  
Benchmark**

ETH Zurich AI-Benchmark  
**AI Performance Score**

# APU 2.0 Advantages vs. CPU / GPU / DSP

• Compared to CPU computing power and power consumption

# Super AI Capabilities :

## Enabling New & Exciting AI Camera Applications

Multiperson pose tracking  
@ 60 fps

Edge AI-  
3D human pose tracking/ Avatar

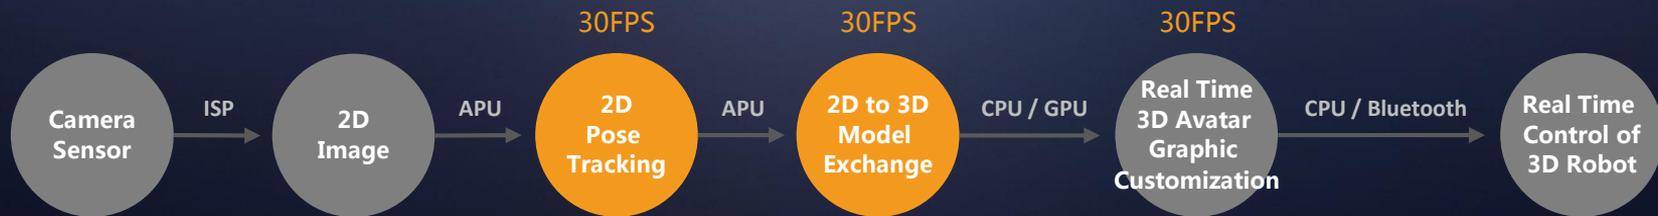

Edge AI-  
Multi Object Recognition

# Industry Leading : Real-Time 3D Human Pose Tracking

# Industry Leading : Real-Time 3D Human Pose Tracking

Can be applied in AR / VR, 3D Motion Sensing Games,  
Virtual Personal Trainer, 3D Fitting Rooms

# NeuroPilot 2.0 : Complete and Open EDGE AI Platform

Face ID

Beautification

Scene  
Detection

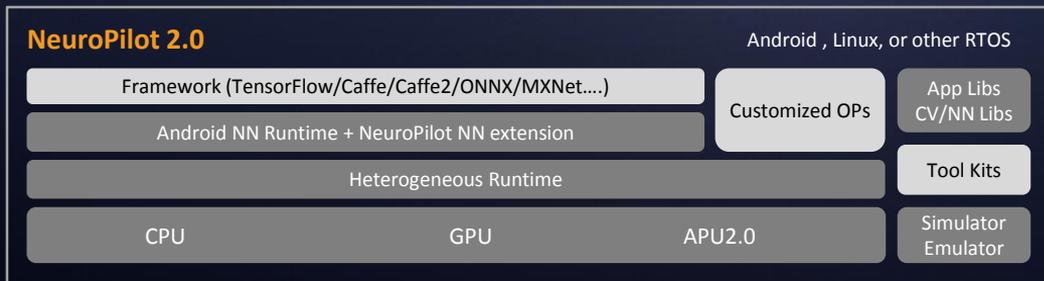

Gesture  
Detection

Voice  
Recognition

Benchmark

## Fully Support Android NNAPI

- Open Architecture
- Can flexibly call upon APU / GPU / CPU based on need
- Better for 3<sup>rd</sup> Party APP Developers
- Increase APU Efficiency

## Provide Comprehensive Development Tools

- NeuroPilot Toolkit

# Partner with 3<sup>rd</sup> Parties to bring different AI applications to life

# Extraordinary AI Camera

Flagship 3x ISP Architecture / Best Portrait Photography

# AI Camera KSPs

## 3x ISP Architecture Upgrade

- First to support 3x ISPs Active simultaneously
- Instant and smooth transition between multiple focal lengths
- 14-bit HDR

## Best Portrait Photography

- AI Face Detection Engine
- AI Noise Reduction
- AI Depth Map

# Industry First : 3x ISPs simultaneously ACTIVE. Instant & Smooth transition among 3 focus lengths, for best imaging experience.

**16 MP**  
120° ultra-  
wide

14-bit ISP #1

**48 MP**  
80° wide

14-bit ISP #2

**8 MP**  
40° tele

14-bit ISP #3

# 14-bit HDR ISP : Best Single Shot HDR Effect

MediaTek helio | P90

Competitor

# Industry's First AI Face Detection Engine

## Extraordinary Performance

- High detection rate and
- High Accuracy

## Super Low Power

- Dedicated HW can lower power consumption by 72%

## Rich Features

- Face Detection / Gender Identification / Movement Prediction

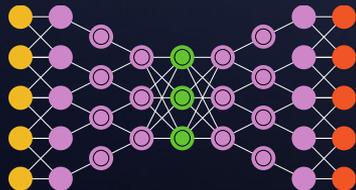

## Works under difficult conditions

- Side of Face / Side of Head / Turning Head / Strong Backlight / Distant Face / Moving, blurry face... can all be detected

# AI Noise Reduction : Surpass Traditional CV Noise Reduction Abilities

## AI NR Model Training

Use AI modeling algorithm, to produce image results that resemble that of large pixel sensors. Surpass traditional CV NR limits, to deliver best image quality under low light environment

## 14-bit HDR ISP

Retain original image details.  
Avoid color and detail loss due to NR

10-bit

14-bit

## AI Multi Frame Noise Reduction

Processing Multi-Frame align/warp/de-ghost with powerful APU computing capability

# Extraordinary AI NR Examples : Low Light Image Capture

MediaTek helio | P90

Flagship SoC #1

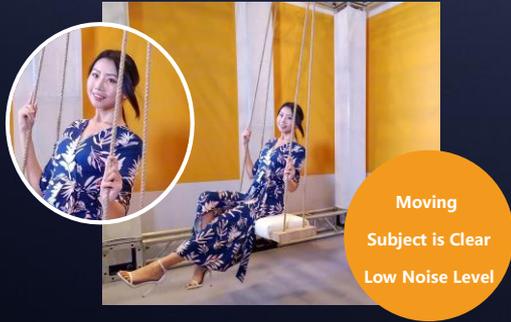

Apple A12

Flagship SoC #2

# Extraordinary AI NR Snapshot : Moving Subjects

MediaTek helio | P90

Flagship SoC #1

Apple A12

Flagship SoC #2

# AI Depth Map

Machine Learning  
+  
Powerful AI Capability  
= Accurate Depth

# AI Camera : Surpass traditional CV algorithm and processing abilities. Provide best camera experience ever.

Best shots when subject is moving

Best shots in dark environments

# CPU / GPU Upgrade

# CPU / GPU Upgrades

CPU Single Core  
increase by **30%**

GeekBench v4.2 Single Core

CPU Multi Core increase  
by **15%**

GeekBench v4.2 Multi Core

GPU increase  
by **50%**

GFXBench 4.0 Manhattan 3.0

# Modem / Connectivity Upgrades

# Modem Upgrades

## Upgrade to Cat-12

Support 3CA  
UL/DL 150/600 Mbps

---

## Support 4x4 MIMO

From 2 Rx to 4 Rx  
Signal +5dB, Throughput +30%

---

## Latency Optimization

Latency improvement by 80% vs prev. gen.  
Better online gaming experience

---

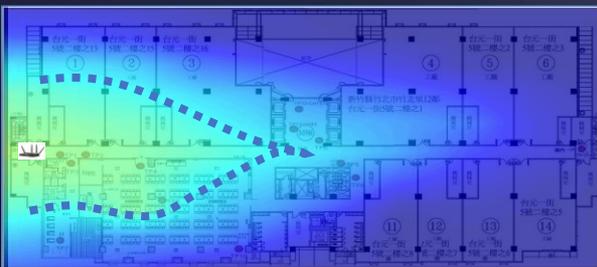

## Lower Power

Talking and Datalink  
Power improvement  
by 20% vs prev. gen.

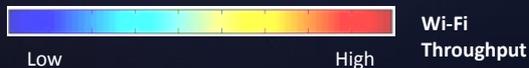

---

# Wi-Fi Upgrades

MediaTek Helio P60 (1x1 SISO)

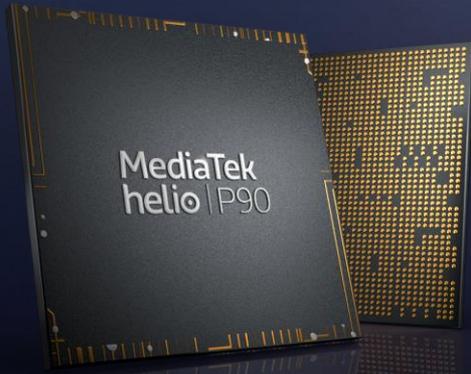

MediaTek Helio P90 (2x2 MIMO)

## Support 2x2 Wi-Fi MIMO

- Double Max. Throughput
- Reception range increase by 20m under weak signal

# MediaTek Helio P90 Platform KSP Summary

## AI Capability Upgrade

- New APU 2.0 Architecture
- TMACs AI Power

## CPU / GPU Upgrade

- CPU Upgrade to A75 / A55 Architecture
- GPU improve by 50%

## Camera Experience Upgrade

- AI + Flagship 3x ISP
- Best Night Shots and Portrait Photography

## Connectivity Upgrade

- Support Cat-12, 3CA
- Support 802.11ac 4x4 MIMO

# Helio P90 Industry Firsts

- **Highest AI-Benchmark Score**
- **AI Camera** : Surpass traditional CV algorithm and processing abilities. Provide best night shot and active shot (capturing split second moment) experience.
- **3X ISP simultaneously ACTIVE**: Support smooth and instant transition from ultra-wide to tele. (3 focal lengths)
- **First to use AI algorithm to track 3D human pose via smartphone camera in real time**
- **Most power efficient 4G modem**

*everyday genius*
