

MediaTek Dimensity 820

Incredible 5G Experiences with this Best-in-Segment Performer

'Big Core' Powerhouse

- 4X Arm Cortex-A76 up to 2.6GHz
- 4X Arm Cortex-A55 up to 2GHz
- 5X Arm Mali-G57 GPU

Four big Arm cores with up to 2.6GHz super-speeds mean faster games, faster app loading, and overall boosted multi-core performance.

MediaTek HyperEngine 2.0 Gaming Technology

The new MediaTek HyperEngine 2.0 delivers a powerful gaming experience with network optimizations that reduce latency for smoother gameplay, support faster response times and enhance display quality.

Technology-Leading, Fully Integrated 5G SoC

- **Essential 2CC Carrier Aggregation**
Over 30% greater coverage layer than 1 CC CA, plus seamless handover between two 5G connection areas.
- **MediaTek 5G UltraSave**
The World's Most Power Efficient Smartphone 5G Modem Design with exclusive technologies.
- **Dual 5G SIM with VoNR**
Dual 5G SIM technology gives access the fastest speeds and VoNR services

MediaTek APU 3.0

The unique design of MediaTek's APU 3.0 (AI Processing Unit) produces more precise results for AI-Recognition, AI-Super Resolution and AI-deblur functions, while also maximizing power efficiency.

MiraVision Video Playback

MediaTek MiraVision intelligently adjusts a wide range of video playback dynamics to bring a cinema-grade visual experience to the small screen.

AI-PQ | HDR Composer (SDR to HDR) | Enhanced HDR10+ video playback

Fantastic 120Hz Displays

Rapid refresh displays are ideal for gaming, while also better for smoother scrolling of webpages and animations in apps.

MediaTek Video Capture & Streaming

MediaTek Dimensity supports up to 80MP cameras, 4K HDR video recording and dedicated imaging processors and accelerators for incredible results every time.

Multi-Frame 4K HDR Video Capture | HDR-Native ISP
